- Inspected work sites, pulled permits, and designed scaffolding plans for the sites

TECHNICAL SKILLS

HTML CSS JavaScript React Redux
Node Express Python Git SQL

PERSONAL PROJECTS

Get2It - A task managing web app (11/2019 – 01/2020) ⧉
- Was the lead Front-End developer for this application.
- This app was developed using React.js, React-Router, Redux, and Redux-Persist.
- Was responsible for setting up the app using CRA, setting up the authentication and routes, creating all actions and reducers for updating/retrieving data for state management using Redux, and for over 80% of the development of components and styling of the app.
- https://github.com/Lambda-School-Labs/get2it-fe/tree/master/get2it

Foodie-Fun (07/2019 – 07/2019) ⧉
- Developed the entire Front-End portion of this Application in a single week of evenings after work.
- The app was developed using React.js, Redux, and CSS.
- All design and functional methods used came from my own research and/or imagination.
- This project is still a work in progress, but I am very proud nonetheless of what was accomplished in just one weeks time.
- https://github.com/build-week-foodiefun/Front-End/tree/master/foodie_fun

TJ's Todo List ⧉
- This todo list was made using HTML, CSS, and JavaScript.
- This project was developed in about 8 hrs.

Portfolio (02/2020 – Present) ⧉
- This portfolio is made using React.js.
- It is continually a work in progress, as I am continually a work in progress.
- As I learn and grow, so shall my portfolio.
